Domino Development

R-Com Consulting is a Premier IBM Business Partner.

At R-Com Consulting we have built applications for some of the largest companies in the country. We have been designing web enabled Domino applications since Domino was in its 4th release (R4), around mid 1997. We have the experience to handle any sized project. We have developed applications using Lotus Notes versions. 4.x and 5.x, and ND6. For both Notes Clients, Notes and web based clients and dedicated web applications.

We have an onsite Domino Server running the latest ND6 and ND7 versions to use as a development server. So all applications can be created and tested without using your production servers. The Server is fully secure to ensure you complete security.

We also provide hosting for low use applications.

As a team of highly experienced Certified Lotus Professionals/Certified IBM Developers for Lotus software, R-Com Consulting team members specialise in creating inviting, attractive, and easy-to-use Notes and Domino applications, whether for public use or internal.

R-Com Consulting's Notes/Domino Development competencies include:

- User interface designs with high ease of use
- Domino web sites that don't look like Domino web sites
- Easily-managed and updated content
- Custom Javascript, HTML and DHTML
- LotusScript
- Workflow and email integration
- Easy-to-understand Help Documentation
- Extensive testing
- Developing your internally-generated or marketing firm's designs into Notes/Domino
- On-site assistance/contract work
- Content development (writing and graphics) and maintenance

R-Com Consulting are happy to work with companies to assist them in achieving an integrated application platform that can grow with the company's needs. We also have experience in integration with back-end systems and other solutions such as SameTime and QuickPlace.

Our Certified Lotus Professionals specialise in developing email, web, and workflow applications for companies already using Lotus Notes and Domino. Our professionals hold certifications in Domino versions 4.x, R5, ND6 and ND7 and have the experience to integrate your existing legacy data into your Domino infrastructure for ease of access among all employees.

Notes/Domino contains an extensive range of working tools. Therefore, using Notes/Domino allows developing powerful distributed systems and secure applications for an enterprise. Most of the Lotus team members have at least 3 years of experience working with Notes/Domino development tools and instruments.

The following types of business solutions could be developed by R-Com Consulting using a standard Notes/ Domino toolkit:

- Electronic Workflow for Enterprise,
- Business Processes Automating System,
- Automated Document Management,
- Knowledge Management,
- E-Learning Management,
- Project Management,
- Human Resource Management,
- Customer Relationship Management,
- Change Management/ Request Management
- Information portals.

Lotus Notes / Domino developers team

The R-Com Consulting team offers a full-cycle development of the applications based on Lotus Notes / Domino platforms.

R-Com Consulting is comprised of IT specialists with strong background in development of Lotus Notes / Domino based applications. Although the team is highly proficient in other IT areas, Lotus based solutions is a core specialisation of the department. Having such specialisation enables the team to further grow its expertise in that field and provide our customers with very competitive Lotus Notes/Domino based solutions.

Before the team starts developing any solution, it conducts a thorough analysis of the customer business needs to determine the most effective way to approach and resolve a customer's business problem. Extensive business experience allows the team to choose the tools and technologies that provide the best possible result to the customers in terms of money invested, time spent, and reliability of the employed technologies.

We welcome you to learn more about the Lotus team, skills and qualifications of its members, and the types of our Lotus Notes / Domino based solutions. We also invite you to find out how Lotus team can serve your needs. We are not promising miracles. All we can offer is a quality cost effective solution developed by a team of seasoned Certified and Experienced Lotus Software specialists.

Benefits With application development assistance, you'll receive:

- Lotus Domino and Lotus Notes applications that meet business requirements
- Faster applications development
- Skills transfer to your development teams
- Integration with other IBM software and your existing applications
- Enhanced functions from the latest Lotus Domino software releases
- Applications with good performance

What we offer your development environment

The success of your Domino application development project depends on the expertise of the Development team. R-Com Consulting has a team of expert Lotus Notes and Domino developers who can assist your development team by filling skill gaps, mentoring your developers, or managing a development project from beginning to end. R-Com Consulting consultants offer the following qualifications:

- ❑ Experience with all current releases of Lotus Domino on all supported server and client platforms
- ❑ Create and modify Domino applications for Lotus Notes, Web browsers, wireless devices and PDAs
- ❑ Skills to integrate Domino applications with various back-end systems
- ❑ Experience with all related IBM solutions (for example, IBM WebSphere® Portal, and Lotus Workplace), as well as various third-party options
- ❑ Capability of integrating Lotus Notes with other applications such as Microsoft® Word and Microsoft Excel
- ❑ Commitment to the latest products, with a number of industry certifications
- ❑ Experience integrating Domino with IBM WebSphere to design hybrid applications and leverage the strengths of both platforms

We can handle projects of any size - from quick-hit departmental applications to enterprise-wide mission critical applications and Web sites servicing thousands of users.

R-Com Consulting application development services include:

- ❑ Web enabling existing applications: Do you need to provide Web browser access to your existing Lotus Notes client applications?
- ❑ Extending applications to a mobile workforce: Do you need to provide mobile device access to your existing Lotus Notes client applications?
- ❑ Upgrading applications for ND7: Many companies are still migrating from previous releases of Lotus Notes and Domino. While most applications written for previous releases will run under ND7, there are known issues. R-Com Consulting experienced consultants can assist you to migrate even your most complicated applications and help you determine where new Domino features will add new functionality to your application(s).
- ❑ Application maintenance: Do you have applications that are in need of maintenance, but you don't have the development resources to do the work?
- ❑ Application performance analysis: If you have an application that is performing poorly, R-Com Consulting consultants can help you discover the problems and implement improvements. We can also help define high performance architecture for your application during the design phase.
- ❑ Mentoring: R-Com Consulting developers are frequently called into customer sites to teach Domino skills in the context of working on an actual development project. We work hand-in-hand with your development staff, sharing our experience as we work on solutions to your business issues. When we leave, you have a solid application and a development staff with the skills to carry it into the future.
