

VMware View: Install, Configure, Manage

Course Overview

This hands-on training course builds your skills in the VMware View™ suite of products: VMware View Manager, VMware View Composer, and VMware® ThinApp™. This course is based on the View 4.5 and ThinApp 4.6 releases.

Before attending this course, you must be able to perform the following tasks:

- Create a template in VMware vCenter™ Server and deploy a virtual machine from it.
- Modify a template customization file.
- Open a virtual machine console in vCenter Server and access the guest operating system.
- Configure Active Directory services.

Course Objectives

At the end of the course, you should understand the features and operation of View and be able to:

- Install and configure View components
- Create and manage dedicated and floating desktop pools
- Deploy and manage linked-clone virtual desktops
- Configure and manage desktops that run in local mode
- Configure secure access to desktops through a public network
- Use ThinApp to package applications

Target Audience

System administrators and system integrators who are responsible for deployment of VMware virtual desktop infrastructure

Prerequisites

Required

- Experience in Microsoft Windows Active Directory administration
- Experience with VMware vSphere™

Recommended

- Completion of VMware vSphere: Install, Configure, Manage

Pricing

Contact your VMware representative or a VMware Authorized Training Center for pricing information.

Delivery Methods

- Instructor-led training
- Live-online
- Onsite training

Course Duration

- Four days of instructor-led training
- 60% lecture, 40% hands-on lab
