Don't take our word for it, see what our customers' are saying!

Housing

"We're glad we made the move to 10ZiG Technology and are reaping the rewards of this decision. Right from the beginning 10ZiG have been a pleasure to deal with from both a sales and support viewpoint. We've forged a great working relationship."

- Andrew Rayfield, Infrastructure Technology Team Leader

Finance

"A lot of Support Teams are hard to get a hold of and very hard to understand. In so many cases this day in age support seems to be very lacking, but our experience with 10ZiG has been great in the very rare instances we have had to call."

- Tim Miller, Senior Vice President and Manager of IT

Education

"10ZiG helped South Bromsgrove High School break new boundaries into the world of desktop virtualisation, helping to seamlessly create a working environment for our students which totally exceeded our expectations. Not only by providing us with an excellent product but also by working closely with us in developing exciting new features for the future."

- Janet Lines, Network Manager
